SOURCE EVALUATIONS ARE DEFINITIVE APPRAISAL OF CONTENT IS TENTATIVE.

1. Before nationalization in 1958, the Vasile Roaita Metallurgical Plant, Bucharest, belonged to D. Voinea. Five hundred laborers were employed in the plant which manufactured balance scales and mill scales. The State enlarged the plant and adapted it to the production of pumps.
2. The pumps made at the plant are for use in land reclamation. During the work on the Danube River-Black Sea canal several types of pumps were made for use on this project which are no longer being manufactured. There is a scarcity of raw materials, equipment and replacement parts in the factory and the work is frequently interrupted for these reasons.
3. The plant has approximately 1,000 employees including technicians, and operates in three 8-hour shifts daily. The director of the factory is Gheorghe Ionescu.
